

## U-FLEX PANEL LIFTER

U-flex panel lifter, referred to as raised access floor panel puller, tile lifter, or suction lifter, is an essential access floor lifting tool with one or two suction cups on both ends used to lift the raised flooring panels. A panel lifter is the industry standard lifting equipment used to lift the panel to provide access to the underfloor services, making it easier for installation and maintenance. These panel lifters are made with advanced pressure release technology with excellent carrying capacity ensuring easy lift without causing damage to the system.

Parameter	Observation (mm)
Height	135 mm
Length	275 mm
Suction cup Dia.	125 mm
Suction cup center distance	150 mm
Total weight of panel lifter	0.890 kg
Load capacity (max)	40 kg

### BENEFITS

- ▶ Designed for quick access to make alterations and installations simple.
- ▶ Easy and efficient to use and compatible with all types of raised access floor systems.
- ▶ It prevents damage to the access floor panels and improves the system's longevity.
- ▶ Replaceable rubber suction cups expand the service life of the lifter.
