

UNITILE USF MEDG HPL EB EDGE SUPPORT RIGID GRID (ESRG) SYSTEM

PANEL ILLUSTRATION

Category	Laminated – Edge Beeding, ESRG System
Panel size	600 x 600 mm
Core Material	Cement
Panel Core Thickness	33 mm
Panel Weight	13.450 kgs
Weight of System	42 kgs /m ² for FFH 300mm (varies with height)
Overall Floor Height	65 mm – 2000 mm

FEATURE BENEFITS

- Enhanced load-bearing capacity.
- Higher footprint area on pedestal head leading to enhanced stability & improved load carrying capacity.
- No overlapping of panels.
- Edge Support Design reduces the risk of damage to the panel edges during exposures to rolling and impact loads at site.

PRODUCT STRUCTURAL PERFORMANCE

Conforming BSEN 12825:2001 Clause no 4.1 & 4.2.2

Concentrated Load (Point Load)	363 kgs (800 lbf), at 2.50 to 3.00 mm deflection. Falls in class "B"
Ultimate Concentrated Load	908 kgs (2000 lbf)

Conforming to Master Specs 10270 / 096900 (USA) CISCA A/F, 'Recommended Test Procedures for Access Floors'

Uniformly Distributed Load (UDL)	1650 kgs/sq.mt.
Rolling Loads	180 kgs (397 lbf)
Stringer Loads	102 kgs (225 lbf)
Pedestal Axial Load Test	22 kN
Pedestal Over Turning Moment Test	113 N x Meters

SYSTEM DESCRIPTION

USF Medium Grade Access floor panels are uniquely designed with hemispherical reinforcing pockets on the underside. It ensures structural strength, ultimate durability and acoustic performance.

The pedestal assembly shall provide easy adjustment of leveling and accurately align panels for a maximum ±25 mm in the vertical direction. The Pedestal head assembly shall consist of embossed head mechanically riveted to a rolled formed stud and 2 check nuts for level adjustment and arresting vertical movement. The pedestal head shall consist of an anti-vibration PVC cap with inbuilt isolating spacers for Panel and stringer location.

The stringer shall be continuous box type, for strength, lateral stability, and for enhanced rolling loads performance and to support the panels on all four sides for alignment without leaving any gap at the pedestal head preventing air leakage.

PANEL CONSTRUCTION

USF Medium Grade Access Floor panel is of size 600 x 600 mm, it is all steel welded construction with an enclosed bottom pan of hemispherical cones and the top plain sheet is fuse-welded at 144 locations to form a panel.

The hollow panels are pretreated and coated with electrostatically deposited powder coated 60 - 80 micron thick on all the exposed sides of the panel. The hollow core of the panel is injected with a light weight, fire retardant, noncombustible cementitious compound at high pressure to ensure support of not less than 90% of the top surface area of the panel.

The panel is then laminated with floor grade Antistatic Laminate on a semi-automated lamination line to ensure maximum bonding to the steel surface. The edges of the laminated are protected with conductive PVC edge trim 5 mm wide on all sides. This edge trim is mechanically locked and sealed in place to avoid detachment.

APPLICATIONS

- Computer Room
- Server / Hub Room
- Switch Room
- Communication Room

FACTORY BONDED FINISHES

- HPL

UNITILE USF MEDG HPL EB EDGE SUPPORT RIGID GRID (ESRG) SYSTEM

OTHER STRUCTURAL PARAMETERS

Soft body impact	Tested as per BSEN 12825:2001, Clause No 5.5.1
Hard body impact	Tested as per BSEN12825:2001, Clause No 5.5.2
Fire rating	Class O & Class 1, as per BS 476 Part 6 & 7 & BS 476 Part 4:1970 (Non -Combustibility)

INSTALLATION TOLERANCE

Overall level before application of any load	±1.5 mm over any 5.00 sq. mt. ±6 mm over any size of basic space
Panel Level	±0.75 mm before the application of any load
Panel Interchangeability installation and removal	Interchangeable (except for field cut panels) & replaceable in any of the four directions at 900 increments

ELECTRICAL RESISTIVITY

As per ASTM F150/ NFPA 99 modified for surface to ground.
Tested at 500 volts:

Anti-static range	$1 \times 10^9 - 2 \times 10^{10}$ Ohms (surface to surface)
--------------------------	--

FABRICATION TOLERANCE

Floor Panel Flatness	±0.75 mm in any direction
Floor Panel Width or Length from specified size	±0.50 mm
Floor Panel Squareness	±0.38 mm

SPECIAL APPLICATIONS

Bridging Sections	Where obstructions prevent the use of pedestals
Ramp Pedestals	Pivot head pedestal to support angled ramp panels

Note:

- The above mentioned loading parameters are derived & defined on the basis of the tests performed by the manufacturer based on the guidelines provided by the specified standards or as per manufacturer's recommendations.
- Manufacturer has all the rights to change or revise the specifications as and when applicable or required without the prior notice.
